

VPS, short for Virtual private server, can minimize the delay between the MT4 client terminal and the MT4 server. By using the data center system in a safer location, traders can maximize their use online to experience faster execution speed, obtain higher transaction volume, and seize better trading opportunities.

## Application Instructions

1. Customers need to order the VPS service by themselves, and send a reimbursement application email (please attach the voucher) to [info@startrader.com](mailto:info@startrader.com). after reaching the reimbursement threshold. Once the review is completed, STARTRADER will directly issue the reimbursement fee to the MT4 account. The reimbursement application email will not be processed before the service threshold is reached. The reimbursement application email template is shown as follows:

Subject: XXX (customer name)-XXX (MT4 account number)-VPS expense reimbursement application

Text:

Name: XXX

MT4 account number: XXX

Purchase date (must be consistent with the invoice time): XXX

Purchase amount: XXX USD

2. You can apply for VPS reimbursement fees purchased up to 3 months before the email is sent (but the reimbursement threshold must be met).

To optimize your trading experience, STARTRADER provides VPS services for clients!

Reimbursement cap	
TIER 1	20 USD/ month
TIER 2	30 USD/ month

Reimbursement thresholds	
TIER 1	Initial funds > 3000 USD Trading lots/month > 5 standard lots
TIER 2	Initial funds > 5000 USD Trading lots/month > 10 standard lots

\* "Month" here is defined as 30 calendar days from the date of VPS activation. The activation date is subject to the time indicated in the reimbursement voucher.

### 24/7 Trading

You can run the EA 24 hours a day, even when the computer is turned off.

### Reduce Latency

VPS can act as a powerful transaction server, providing clients a faster executing speed.

### Private Server

This server is dedicated to EA trading, and any other applications will not be running at the same time.

### Maximum Stability

You will no longer be limited by local network restrictions, such as poor network quality, network connection failures and other issues.

### Strong Compatibility

Highly compatible with multiple operating systems of Windows, Mac and Linux.

### Easy Access

You can easily log in to your platform from any computer and any place.

## Risk Statement

1. The VPS service above is provided by a third-party vendor. STARTRADER assumes no responsibility for any trading losses, delays, or connectivity issues caused by VPS malfunction or service disruption.
2. Clients should address any technical problems directly with the VPS provider.
3. Before using the VPS service, clients are strongly advised to understand the relevant characteristics of EA and consult both EA and VPS providers when in doubt.
4. Trading CFDs with a VPS does not mitigate the inherent risks, including the possibility of rapid loss of capital.
